

IT'S TIME TO MODERNIZE YOUR ANNUAL PRODUCT QUALITY REVIEW (APQR) PROCESS

Ineffective annual product quality review (APQR) preparation hinders product quality decisions, leading to inefficiencies and errors in the process.

Automating APQRs can help organizations simplify their product quality review process and make informed product quality decisions faster and more routinely.

OUTDATED

Approach to APQR	The Result
 Data from siloed, disparate systems	Disconnected information, inefficient data gathering
 Conducting APQRs manually	Time-consuming, error-prone process
 Failing to incorporate continuous improvement	Unresolved, recurring quality issues
 Inefficient coordination, no standard processes	Slower review and approvals

MODERN

Approach to APQR	The Result
 Simplifying report creation	Automated reports ready for eSignature and submission
 Automating data collection and statistical analysis	Improve efficiency while reducing manual errors and redundancy
 Collaborating across departments with real-time access to updates and actions	Seamless collaboration, clear assignments across departments
 Conducting reviews, at any time	Routinely assess product quality for continuous improvement

TRANSFORM THE APQR PROCESS

Apply the latest digital technology to automate the process end-to-end and streamline data collection, analysis, collaboration and approval processes.

LEARN HOW TO TRANSFORM YOUR APQR PROCESS.
